The AUSTRALIAN COMPUTER JOURNAL

VOLUME 24

February 1992 to November 1992

CONTENTS

Contributions

1. February 1992

Broadbent, M. and Hansell, A., Lloyd, P. and Dampney, C.N.G.	Managing information systems in Australia and New Zealand: Requirements of the 1990s	1-11
Henderson-Sellers, B.	Object-oriented information systems: An introductory tutorial	12-24
Clarke, R.	Case study Cardomat/Migros an open EFT/POS system.	25-36

2. May 1992

Eades, P. and Moffat, A.	Guest Editorial: Algorithms	41
Whitesides, S.	Algorithmic Issues in the Geometry of Planar Linkage Movement	42-50
Cannon, J. and Havas, G.	Algorithms for Groups	51-60
Chaudhuri, P.	Parallel Search Algorithms for Trees and Graphs	61-69
Moffat, A. and Petersson, O.	An Overview of Adaptive Sorting	70-77

3. August 1992

Vowels, R.A.	Division by 10.	81-85
Bailes, P.	Guest Editorial: Special Issue on Software Engineering	86
Rout, T.P.	Quality, Culture and Education in Software Engineering	86-91
Iannella, R.	Designing 'Safe' User Interfaces.	92-97
Vernik, R.J. and Turner, I.	Techniques and Tools for Analysing Software Products.	98-105
Grant, D.D. and Smith, R.	Undergraduate Software Engineering — An Innovative Degree at Swinburne	106-113

4. November 1992

Kemp, R.H.	Intelligent Computer Assisted Instruction: a Knowledge-based perspective	121-129
O'Connor, A.D.	Soft Systems Methodology — A Case Study of its use within an Australian Organisation	130-138
Yasrebi, M.	A Review of Various Philosophies on the design and Analysis of Parallel Computer Architectures for Vision	139-151
Dew, R.A.	Determining Maximal Subsets of Enabled Transitions when Simultaneous Conflict Occurs in Petri Nets	152-161

Miscellaneous

Book reviews	37-40, 78-80, 116-120, 162-163
Book Review Information	50
New Guidelines, Electronic Book Review Management and Publication	91
Books Received	114, 164
Call for Papers — Special Issue on Software Quality	97
Call for Papers — Auscrypt '92	115
Call for Papers — ICIS	129
Call for Papers — The Open Systems Future: Leveraging the LAN	151
Letters to the Editor	161

TITLE INDEX

(Titles in italics are for book reviews)

A Review of Various Philosophies on the Design and Analysis of Parallel Computer Architectures for Vision 139-151

Advances in Computers, Vol 29 37-38

Algorithmic Issues in the Geometry of Planar Linkage Movement 42-50

Algorithms for Groups 51-60

An Overview of Adaptive Sorting 70-77

Analysis and Design of Business Information Systems 119

Case Study Cardomat/Migros an open EFT/POS system 25-36

CICS Command Level Programming 163

Computational Vision 78-79

Computer Based Information Systems, An Introduction 116

Connectionist Robot Motion Planning 162

Data and Computer Communications (Second Edition) 39

Data Protection Codes of Practice 117

Decision Support and Expert Systems (2nd Edition) 80

Designing 'Safe' User Interfaces 92-97

Determining Maximal Subsets of Enabled Transitions when Simultaneous Conflict Occurs in Petri Nets 152-161

Discrete Cosine Transform: Algorithms, Advantages, Applications 38-39

Division by 10 81-85

Embedded Controller FORTH for the 8051 Family 118-119

Fortran 90 Explained 38

Good Design for DTP Users 37

Guest Editorial: Algorithms 41

Guest Editorial: Special Issue on Software Engineering 86

Intelligent Computer Assisted Instruction: a Knowledge-based perspective. 121-129

Intelligent Robotics 37

Intelligent Systems Design: Integrating Expert Systems, Hypermedia and Database Technologies 79-80

Introduction to Robotics 163

Introduction to VM: A Beginner's Tuning Guide 38

Knowledge and Inference 120

Machine Learning and Uncertain Reasoning 79

Managing Information Technology's Organisational Impact 119

Managing Information Systems in Australia and New Zealand: Requirements for the 1990s 1-11

Mastering UNIX Serial Communications 37
